Algebra I: Fall Semester 2018

Welcome to Algebra I

Welcome to our class! This year, we will learn a great deal of mathematics. You will work both individually and in cooperative teams. As with learning anything new, practice is required, which means there will be homework nearly every night. You should expect to be challenged and expect to make mistakes. You will learn by understanding and correcting these mistakes. Do your best and you will be rewarded with an exciting math experience!
